Spider Biology, Ecology, and Identification

Kefyn Catley

October 31st–November 9th, 2022

This seminar will present a comprehensive introduction to spider systematics, morphology, behavior, physiology, ecology, and spider/human interactions, myths and folk law. Format will be based around Powerpoint presentations that not only provide information but pose questions and encourage class discussion. A phylogenetic approach will be used describing each taxon as a function of its evolutionary history and distribution of characters. Characters that allow for field identification will be highlighted and participants are encouraged to share spider photos and observations for class discussion. Fall is a good time to find adult female spiders in their webs and methods for finding and collecting spiders will also be discussed.

Scheduling Details

Oct 31, Nov 2, 4, 7, 9
7–9 PM ET

Participants need to have a Zoom account (<https://zoom.us> sign up for zoom is free). You will receive a secure link to join the instructor before each class. Classes will be recorded so participants can review them or make up missed ones.

About the Instructor

Dr. Kefyn Catley (kcatley@wcu.edu) is an emeritus professor of biology at Western Carolina University where he taught and conducted research in organismal evolutionary biology and science education. He holds a PhD in arthropod systematics from Cornell and was a research scientist at the American Museum of Natural History, New York, NY. Traveling extensively, he has studied spiders on four continents, held faculty positions at Rutgers and Vanderbilt universities and has taught the Spiders of the Southern Appalachians class at Highlands Biological Station, NC since 2004. Please feel free to email me with questions.
