

## General Acknowledgments

The editors of this Special Issue are grateful to the US National Park Service for financial support. We are grateful to the Boston Harbor Islands Partnership and the managers of the Boston Harbor Islands who provided access and logistical support for the studies, including the Massachusetts Department of Conservation and Recreation, the City of Boston, Thompson Island Outward Bound Education Center, the Trustees of Reservations, Boston Harbor Now, the US Coast Guard, the Massachusetts Water Resources Authority, and the town of Hingham. We also thank captain Russ Bowles and UMass Boston Marine Operations for flexible, expert piloting of the landing craft to provide researcher access to field sites. Thanks also to the partners that hosted the 2017 Boston Harbor & Islands Science Symposium, which inspired this Special Issue, including the National Parks of Boston, Boston Harbor Now, the US Environmental Protection Agency, the Massachusetts Office of Coastal Zone Management, the Mass Bays National Estuary Program, Northeastern University, the University of Massachusetts Boston, and the New England Aquarium. None of the projects presented in this Special Issue would have been possible without the many staff, volunteers, interns, and citizen scientists who contributed long hours and early mornings. The fungal ATBI project, which is presented here in 3 papers, has benefited from long-term partners including the Boston Mycological Club, Zachary Chaves, Lawrence Millman, and Donald H. Pfister, as well as from field assistants Alden C. Dirks, Edgar Franck, and Lara A. Kappler. Finally, we would like to thank Keith Goldfarb at the *Northeastern Naturalist* editorial office and manuscript editors James Cardoza, Christopher M. Heckscher, Joseph Johnson, Joshua Ness, Susan Pagano, David Richardson, and Hannah Webber.

Special Issue Co-Editors:

Marc Albert  
National Parks of Boston, Charlestown, MA

and

Danny Haelewaters  
Department of Biology, Ghent University, Ghent,  
Belgium, and Faculty of Science, University of South  
Bohemia, České Budějovice, Czech Republic
