Bibliography of *Macrochelys* Literature

This document contains literature citations for all 963 items mentioned in the Introduction that we used for the table and graphs. We have subsequently added 96 more citations since the December 2022 cutoff, including all 28 articles included in the *Southeastern Naturalist* (Special Issue 12). We intend to continue updating our list as we encounter overlooked literature and as new items are published. We would be pleased to receive information about new publications and any literature you find missing.
