

Paleontology Now - Submission Guidelines

Publishing format. Paleontology Now (www.eaglehill.us/pnow) follows an article-by-article publishing model. Each article is published promptly online when the author and manuscript editor have agreed upon a final manuscript. Each article has its own cover featuring a color photograph.

Language considerations. The publication language of the journal is English.

Author considerations. Manuscripts that lend themselves well to being presented in an academically-rigorous photo essay format may be submitted by anyone knowledgeable about any subject in paleontology. Authors are encouraged to get outside review of their manuscript before submitting it to the journal. Manuscripts derived from, or that anticipate, dissertations and theses are welcome, especially when a seasoned perspective is added through co-authorship by a faculty member.

Submission of manuscripts. A Microsoft Word and PDF file of the complete manuscript, with all accompanying figures, and tables, etc., should be sent to office@eaglehill.us. Files larger than 10MB should be sent by way of a Dropbox link. Please see the following webpage for formatting details:
<https://www.eaglehill.us/programs/journals/epal/epal-formatting-guidelines.pdf>

A cover email should include a statement that the manuscript has not been published or submitted for publication elsewhere, either in whole or in part. It also needs to state if aspects of the manuscript may be considered potentially controversial in some way. This helps the journal to better understand such manuscripts and to consider options for an impartial and balanced peer review.

In their cover email, authors are encouraged to recommend the names, qualifications, and e-mail addresses of potential reviewers for consideration by the journal Editor. Journal Board members make their own recommendations. The choice of who the manuscript editor will be is made at the discretion of the journal Editor. Manuscript editors choose their 2 reviewers, at their discretion.

Revisions, acceptance, and galley. Once a manuscript has been revised and accepted for publication, the author will be asked to provide 1) a single all-text Word file of the final manuscript with any figure legends, tables, and appendices, 2) a pdf file of this file, 3) a 600-dpi resolution jpg or pdf file of each figure, sized as it is to appear in the journal, 4) two or more suggestions of photographs for the article cover, and 5) any supplemental files. A copy editor will review each manuscript, after which it will be laid out as an article. A galley proof of the article will be sent to the author and manuscript editor, with an option to suggest editorial changes. Articles are published when the author and manuscript editor have approved the final galley.

Publication charges. Paleontology Now does not have publication charges. We welcome and rely on sponsors who value the important public service the journal provides by offering an authoritative intermediary publishing format between typical "sketchy" network news reports and research articles. It empowers paleontologists to directly share their most intriguing in-the-moment discoveries, thus inspiring all who are curious to learn what paleontologists are discovering "now!".

Sponsors. Inquiries from sponsors are welcome. <https://www.eaglehill.us/programs/journals/pnow/pnow-sponsors.shtml>.

Posting pdfs. Authors may post a pdf of their article on their personal and their home institution's website.

Artificial Intelligence (AI) Policy. Given the relative infancy of AI technology and that fact that it is still subject to significant issues regarding reliability and accuracy, and that there are serious moral concerns surrounding its use with regards to bias and copyright infringement, the journal currently does not allow the use of AI technology to generate any of the content (text, tables, figures, Literature Cited, etc.) in any submitted manuscript. We realize this is a rapidly evolving field and will be monitoring its progress for the purpose of re-evaluating this policy in the future. For similar reasons, we do not allow the use of AI in the review process for evaluating manuscripts we are considering for publication.

Publication of the journal. The full text version of Paleontology Now is published on the Eagle Hill Institute website (www.eaglehill.us/pnow).
